### 4. First Aid Measures

**Inhalation:** If symptoms of exposure develop, remove to fresh air. Seek medical attention if symptoms persist.
Skin Contact: Wash skin with soap and water for several minutes. If skin irritation or rash develops, get medical attention.

Eye Contact: Immediately flush eyes with large amounts of water for 20 minutes. Get immediate medical assistance.

Ingestion: DO NOT induce vomiting. If the victim is fully conscious, have them rinse their mouth with water. Get immediate medical assistance by calling a doctor or poison center. Never give anything by mouth to a person who is unconscious or drowsy.

Most Important Symptoms: Causes severe eye irritation and possible damage. Causes skin irritation. May cause an allergic skin reaction in sensitive individuals. Harmful if inhaled. High concentrations may cause irritation to the respiratory tract, may cause Central Nervous System (CNS) effects such as headache and dizziness. Aspiration hazard – may enter the lungs during swallowing or vomiting and cause serious lung damage, which may be fatal. Ingestion may also cause irritation of mouth, esophagus and stomach, with nausea, vomiting, diarrhea and abdominal pain. May cause damage to hearing, liver, and kidneys through repeated or prolonged exposure. Suspected of causing cancer.

Indication of Immediate Medical Attention/Special Treatment: Immediate medical treatment is required for ingestions which may result in an aspiration hazard. Material may enter the lungs during swallowing or vomiting and cause serious lung damage, which may be fatal. Immediate medical attention is also required for direct eye contact.

5. Firefighting Measures

Suitable (and Unsuitable) Extinguishing Media: Use water fog, foam, carbon dioxide or dry chemical.

Specific Hazards Arising from the Chemical: Extremely flammable aerosol. Contents under pressure. Closed containers may rupture if exposed to extreme heat. Thermal decomposition or combustion may generate smoke, carbon monoxide, carbon dioxide, and other products of incomplete combustion.

Special Fire Fighting Procedures: Firefighters should wear positive pressure self-contained breathing apparatus and full protective clothing for fires in areas where chemicals are used or stored. Cool fire-exposed containers with water. Use shielding to protect against bursting cans.

6: Accidental Release Measures

Personal Precautions, Protective Equipment, and Emergency Procedures: Eliminate all sources of ignition. Ventilate area with explosion proof equipment. Wear appropriate protective clothing and equipment as described in section 8.

Methods and Materials for Containment and Clean-Up: Place leaking can in a well-ventilated area until propellant has dissipated, if safe to do so. Collect liquid using non-combustible absorbents and place into a suitable container for disposal.

Environmental Precautions: Prevent entry in storm sewers and waterways. Report spill as required by local and national regulations.

7. Handling and Storage

Precautions for Safe Handling: Keep away from heat, sparks, flames, pilot lights, electric motors and all other sources of ignition. Do not spray on hot surfaces. Do not smoke while using. Keep can away from sources of
electricity. Use only outdoors or in a well-ventilated area. Avoid breathing spray. Avoid contact with eyes and skin. Wash with soap and water after use. Keep out of the reach of children. Contents under pressure, do not puncture or incinerate containers.

**Conditions for Safe Storage, Including any Incompatibilities:** Store in a cool, well-ventilated area, away from incompatible materials. Do not store in direct sunlight or above 120°F. U.F.C (NFPA 30B) Level 3 Aerosol.

**Appropriate Engineering Controls:** Use outdoors or with good general ventilation.

**Personal Protective Equipment**

**Respiratory Protection:** None under normal use conditions. For operations where the exposure limits may be exceeded, a NIOSH approved respirator with an organic vapor cartridge and a dust/mist prefilter or supplied air respirator is recommended. Equipment selection depends on contaminant type and concentration. Select in accordance with local and national regulations; and good industrial hygiene practice.

**Gloves:** None required for normal use. Impervious gloves are recommended for prolonged or repeated skin contact.

**Eye Protection:** Avoid eye contact. Always spray away from face. Wear safety glasses if eye contact is possible.

**Other Protective Equipment/Clothing:** None required under normal use conditions.
